610

Provide a link bar

620

Provide a first handle coupled to the link bar, where the first handle has a first handle axis

630

Provide a second handle coupled to the link bar, where the second handle has a second handle axis

640

Provide a first gripper attached to the first handle, where the first gripper comprises a first surface, a second surface spaced apart from the first surface by a circumferential face, and at least one circumferential ridge protruding from and extending circumferentially along at least a portion of the circumferential face and substantially parallel to the first and second surfaces

650

Provide a second gripper attached to the second handle, where the second gripper comprises a first surface, a second surface spaced apart from the first surface by a circumferential face, and at least one circumferential ridge protruding from and extending circumferentially along at least a portion of the circumferential face and substantially parallel to the first and second surfaces
